PART 9 – SHD PROPERTY INSPECTION FORM (For Rehabilitation Projects):

For rehabilitation projects, the SHD Property Inspection Form (Appendix C) must be conducted and submitted with the PDSV. At least 50% of the units must be inspected and documented as part of the SHD Property Inspection Form. More is preferred for adequately developing the scope of work and ensuring major deficiencies are not missed.

All applicants must have their property inspected by a qualified individual who fills out the SHD Property Inspection Form. Qualified individuals include licensed home inspectors, licensed and insured NC general contractors, licensed architects, and local government housing inspectors. Applicant may contact NCHFA for written approval if the proposed inspector has other qualifications that the applicant believes is equivalent or exceeds the above.

Also, properties may require supplementary inspections. If potential structural failures are identified, a structural inspection is required. If the project was built before 1978 and there are no previously performed risk assessments or lead-based paint inspections, a risk assessment should be conducted to identify if lead-based paint and asbestos if present.

At the time of application, projects must use the items identified through the SHD Property Inspection Form as well as the site visit and supplementary inspections to create a Detailed Work Write-up and Project Condition Assessment with estimates. An example is provided in Appendix G.
