Grand Total	150,170	3,356,834	3,507,004	

*Note - Principal balance does not include DPA/Second loans. There are \$217,055,000 DPA loans currently outstanding.

**Note - As these assets are not collateralizing outstanding bonds, funds related to these assets may be withdrawn without test.

***Note - In October 2020 the Agency issued the Series 45 Bonds, a portion of the proceeds of which were used, together with other available funds, to refund the remaining Bonds issued under the Trust Agreement, dated December 1, 2009 between the Agency and The Bank of New York Mellon Trust Company, N.A., as trustee. In connection with the refunding, the mortgage loans financed by the Agency under that Trust Agreement were transferred to the Series 45 Program Account. Under the terms of the Supplemental Trust Agreement under which the Series 45 Bonds were issued, 80.15% of the principal payments on such transferred mortgage loans is dedicated to the payment of maturing principal or mandatory sinking fund redemption payments on the Series 45 Bonds, and then to special redemption of the Series 45 Term Bonds maturing July 1, 2051 (the "Series 45 PAC Bonds") up to specified amounts. Amounts not required for this purpose may be used to redeem other Bonds or make new mortgage loans. 19.85% of the principal payments on the transferred mortgage loans are not dedicated to pay maturing principal or sinking fund redemption of Series 45 Bonds or special redemption of Series 45 PAC Bonds, and may be used immediately to redeem other Bonds or make new mortgage loans.

NORTH CAROLINA HOUSING FINANCE AGENCY
VOLUNTARY DISCLOSURE REPORT – 1998 SINGLE FAMILY RESOLUTION
AS OF DECEMBER 31, 2025

PREPAYMENT SPEEDS OF MORTGAGE ASSETS AND PAC BOND REDEMPTIONS

Under the Agency's Home Ownership Revenue Bond Trust Agreement, principal on mortgage loans and mortgage-backed securities securitizing mortgage loans, whether derived from scheduled principal payments or prepayments of principal, are first set aside to pay the next payment of maturing principal or the mandatory sinking fund redemption requirement for the Bonds issued under the Trust Agreement. Thereafter, under the typical structure of the Agency's Home Ownership Revenue Bond issues, amounts from such principal from mortgage loans and mortgage-backed securities received in each six-month period ending on a January 1 or July 1 is dedicated to the mandatory redemption of a designated maturity (or maturities) of Bonds of the Series that funded the mortgage loans or mortgage-backed securities and commonly referred to as the "PAC Bonds" up to the amounts designated for such redemption from such source at the time of issuance. Under the typical structure, once the PAC Bond redemption requirement for a given period has been met, additional principal received may be used to redeem other Bonds of the Series, redeem Bonds of other Series (referred to as a "cross-call") or, under certain circumstances, be used to finance new mortgage loans or mortgage-backed securities.

The SIFMA Prepayment Model is a standardized framework developed by the Securities Industry and Financial Markets Association (SIFMA) to estimate mortgage prepayment rates of a pool of mortgage loans, and, consequently, the prepayment rate of mortgage-backed securities securitizing such a pool of mortgage loans. The SIFMA Model assumes that prepayments start low and gradually increase. Specifically, the SIFMA model begins with a 0.2% annualized prepayment rate in the first month, which increases by 0.2% per month until it reaches an annualized prepayment rate of 6% at month 30. After the first 30 months, the SIFMA model assumes a constant annual prepayment rate of 6% of the pool. Variations of the model are expressed as percentages of the standard 100% SIFMA Model. For example, 200% of the SIFMA Model would mean that the annualized prepayment rate of a pool of loans will be 0.4% per year in month one, 0.8% in month two, reaching 12% per year in month 30 and remaining constant at 12% per year thereafter. The SIFMA Model does not purport to be either an historic description of the prepayment experience of any pool of mortgage loans or a prediction of the anticipated rate of prepayment of any pool of mortgage loans.

The first following table shows the prepayment speeds, shown as a percentage of the SIFMA Model, as of December, 2025 of the mortgage loans and mortgage-backed securities financed by various Home Ownership Revenue Bond issues of the Agency. The second following table shows information regarding the PAC Bonds of certain Series of Bonds and the actual redemptions of those PAC Bonds from principal on mortgage-backed securities financed by the Series and other sources. While the tables provide historic SIFMA Model prepayment speeds, the Agency makes no representation as to whether the historic prepayment speeds will continue, the percentage of the principal balance of the mortgage-backed securities that will be prepaid as of any date, the overall rate of prepayment of such mortgage-backed securities or the speed with which any series of Bonds will be redeemed with prepayments.
